

Course Description

The Maplelag course dates back to 1990, trail building inspired by the early classic mountain bike trails. Majority of the trails are hand built and hand tuned featuring old school features such as roots, rock gardens, and steep up and downs. Recent builds are slightly more beginner friendly with the "Feeling Lucky" and "Sukkerwest" Loops and also wooden features on new segments "Bjorp's and Moorhead". The trail system features three components: The original inner trails featuring the infamous lakeside drops as well as new builds, "Moorhead" and "Bjorp's". These trails are accessed near the resort. The eastern loop is Bullhead Bootleg which brings riders near Bullhead lake and with bridge crossings in the "Fern Gully" segment. Access to Bullhead can be from the inner trails using the connector or taking the driveway to county road 110, taking a right than a right on the pavement. The western part of the trail system features Twin Lakes singletrack loop that can be accessed from the Maplelag driveway featuring the bridge and consists of a rooty start that can be by passed riding the Twin Lakes ski trail until "Hudson's Hula". Sukkerwest is a great starter loop to the west of the driveway. Twin Lakes, Bullhead Bootleg and Sukkerwest are groomed in the winter time for fat biking.

Laddies Loppet

Labor day weekend we host a mountain bike event, Laddies Loppet. We have been hosting the event since 1990, making it one of the oldest mountain bike races in Minnesota! The race is named after our former, friendly dog, Laddie. This is a great event for the whole family with races and age categories for every type of rider. The two day event features cross country and exciting short track racing and is part of the Minnesota Mountain Bike Series.

MAPLELAG

Welcome to Maplelag Resort and our "one of a kind" mountain bike trails! We are a family owned and operated resort with deep roots in the sport of mountain biking. We have been hand building trails since 1990 and proudly celebrated our 30th year of mountain biking in 2020. We have ridden trails all around the U.S., Mexico and Europe, utilizing these experiences to build trail with the available terrain on our property. We are glad to share our dirt and hope you enjoy our course.

Mountain Biking Since 1990

The trails are open typically from mid-April to the middle of November and any day it is not raining. In 2020 we completed additional trails bringing the total mileage to around 25 miles of mountain bike specific trail.

Check out the website for trail reports and conditions. Maplelag trails are also listed on TrailForks.
